

MC400 Modular Modem

The MC400 Modular Modem combines enterprise reliability with 5G and Gigabit-Class LTE performance. Cradlepoint MC400-capable sites, vehicle, and IoT routers can be easily upgraded to include industry-leading capabilities such as dual modems, 5G, and LTE Advanced Pro.

Provide more usable bandwidth for burst or peak usage by adding the MC400 Modular Modem to a Cradlepoint router.

Deploy multiple wireless backup connections to help reach 99.99% uptime.

Each modem includes two SIM slots for even more data plan diversity options.

Features:

- Offers second modem capability
- Dual SIM slots in each modem
- GNSS support
- Certified versions are available for public safety networks worldwide
- Support for Gigabit-Class LTE Advanced Pro and 5G

Key Benefits:

- Higher availability: Insert an MC400 to add a second active LTE or 5G link for primary and failover connectivity
- Ultimate WAN Diversity™: Combine LTE or 5G with dual-modem, dual-SIM, and multi-carrier functionality; Ethernet; and/or Wi-Fi as WAN
- Flexibility: Auto-switch SIM cards when you've reached your data plan cap
- Future-proof your network: Field upgrade existing routers to the latest modem technology
- Locate assets: GNSS with support for CAD and fleet management, ensures vehicles can always be located
